

Authentic Connection. Real Impact.

Fuel your future with high school intercultural exchange.

THE EXPERIMENT DIGITAL YOUTH LEADERSHIP & COMMUNITY SERVICE SUMMER 2023 PROGRAM

Designed to connect hundreds of young people across the United States with peers in the Middle East and North Africa (MENA) region. The Experiment Digital *Youth Leadership & Community Service* prepares participants to be more civically engaged and lead change. This fully funded six-week summer virtual experience teaches high school students to formulate and implement service projects in their local communities.

Participants come away from the program with:

- An enhanced understanding and practice of leadership
- Increased involvement in civil society and volunteering
- Mutual understanding between youth from different cultures

The Experiment Digital *Youth Leadership & Community Service*, a pioneer in virtual exchange programming, launched in 2016. The program draws upon best practices in experiential learning accumulated over decades of Experiment programming. Originally launched to connect Experimenters with students in countries to which travel and traditional programs were not possible, The Experiment Digital *Youth Leadership & Community Service* is now providing a critical outlet for global intercultural exchange in a time of crisis.

Upon successful completion of the program, Digital Experimenters receive a Certificate of Completion in Leadership & Global Issues Analysis, unique project funding opportunities, and a \$400 scholarship towards participation in one of The Experiment in International Living's programs around the world.

“

I truly feel more empowered to evoke change in my community. The program allows students to think about what issues they face in their community, and they pushed us to really evaluate what we could do to help it. With this, I have a community service project that I would love to implement in my community!
